

9,000-ton

GULF ISLAND MARINE FABRICATORS

**Introducing One of the
Largest Dry Docks
in the Region**

140-ft width

In 2007, Gulf Island Fabrication, Inc. launched subsidiary Gulf Island Marine Fabricators (GIMF), specializing in the repair and construction of towboats, barges, tugs, lift boats, supply boats and casino boats. The 437-acre facility is conveniently located in an industrial friendly area along the Houma Navigation Canal, which has no overhead restrictions.

Our capabilities continue to expand with the opening of the new GIMF dry dock, one of the largest of its kind for shipyards our size along the Gulf Coast, and a significant investment that demonstrates our commitment to the marine industry.

The dry dock and GIMF facility offer these important advantages:

- 140 feet between wing walls
- 9,000-ton capacity
- advanced automated technology, including panel line, cutting tables, girder beam welding facility, and blasting and painting facilities
- large, skilled workforce
- competitive pricing
- the support and availability of local vendors and contractors
- ABS inspectors on site
- U.S. Coast Guard-approved security plan
- ISO 9001-2000 Certified

Gulf Island Marine Fabricators has the resources to complete your job efficiently and cost-effectively. Most importantly, we offer the same commitment to quality and expert craftsmanship that has become a trademark of Gulf Island Fabrication. Trust us for your next marine repair project.
